SKILLS

- Unreal Engine (Game Development)
- C++ (Programming Language)
- Blueprints (Gameplay Scripting)
- IDE (Visual Studio, Rider)
- Git & Version Control

EDUCATION

- GAME INSTITUTE INDIA , MUMBAI
 - UNREAL ENGINE GAME DEVELOPMENT
 - 2024(Oct) - 2026(Jan)
-
- IMED, PUNE
 - MCA (2021-2023)
-
- TRIDENT ACADEMY OF CREATIVE TECHNOLOGY
 - BCA (2018-2021)
-
- MADNAWATI PUBLIC SCHOOL
 - 12TH (2017-2018)
 - 10TH (2016-2017)
-

WORK EXPERIENCE

Xorbix Studio, Remote – Unreal Engine Game Developer – Feb 2026 – Present

- Developed train gameplay features including passenger door selection, seat interaction, and first-person/third-person train controls.
- Implemented station-to-station distance tracking, speed limit warnings, achievements, and keyboard/gamepad input support.
- Developed gameplay logic for train derailment on overspeed, mission completion, and mission failure conditions.
- Added multilingual localization, tested gameplay on PlayStation 4, identified and fixed bugs, and improved gameplay performance.
- Redesigned the main menu and enhanced the in-game UI for a better player experience.
- Implemented train color customization, graphics settings, and audio settings.
- Improved the level selection flow and added keyboard/gamepad navigation with button highlighting across all UI screens.

- Developed a drone customization system with drag-and-drop functionality for interchangeable FC, battery, motor, and propeller components, and added a flight simulation system.

Enexion Energy Private Limited , Pune – Software Engineer – June 2024 – September 2024

- Created the Android UI layout for the company’s dashboard to show EU energy price data.

MDI Networx, Pune – Software Engineer – Dec 2022 – March 2024

- Built and maintained RESTful APIs using ASP.NET Web API for the Fulfillment project used by the Android app.
- Developed secure user onboarding with email OTP verification, security questions, and login system to protect medical documents.
- Added token-based security and thorough validation checks for all APIs to ensure data accuracy and safety.
- Logged API errors systematically to improve reliability, reduce bugs, and enhance performance.
- Created API to capture device information to help troubleshoot version-related issues.
- Used Postman and Swagger for API testing and documentation.
- Worked closely with Android developers, QA team, and project managers for integration and testing.

- Built a feature using JavaScript + Fabric.js to overlap images and allow users to download the final output.

ABOUT

Unreal Engine Game Developer skilled in C++ and Blueprints, focused on building gameplay systems, AI, and interactive game mechanics for engaging player experiences.

PROJECTS

VAULTRUNNER – 2.5D SIDE-SCROLLER GAME

Technologies Used : Unreal Engine, C++, Visual Studio, GitHub.

Developed a 2.5D side-scroller featuring advanced player movement, AI drones, interactive obstacles, and a speedrun system.

- [Gameplay Link](#)
- [Github Link](#)

CYBER–RUNNER – 3D ENDLESS RUNNER GAME

Technologies Used : Unreal Engine, Blueprints, Visual Studio, GitHub

Developed a space-themed endless runner featuring oxygen collection, obstacle avoidance, player abilities, and spaceship combat.

- [Gameplay link](#)
- [GitHub Link](#)

SCORPION–RUSH – 3D ENDLESS RUNNER GAME

Technologies Used : Unreal Engine, C++, Visual Studio, GitHub.

Developed a fast-paced endless runner inspired by Scorpion from Mortal Kombat, featuring advanced movement, combat mechanics, destructible obstacles, and score tracking.

- [Gameplay link](#)
- [GitHub Link](#)

HANDS OF DOOM – TOP DOWN SHOOTER(GAME JAM PROJECT)

Technologies Used : Unreal Engine, Blueprints, Visual Studio, GitHub.

Developed a top-down arena game featuring hand-based combat, wave-based survival, and progressively challenging enemies.

- [Gameplay link](#)
- [GitHub Link](#)

ALIEN APOCALYPSE – THIRD PERSON SHOOTER GAME (PROTOTYPE)

Technologies Used : Unreal Engine, Blueprints, Visual Studio, GitHub.

Developed a sci-fi third-person shooter featuring ranged combat, multiple weapons, energy shield mechanics, and AI-driven alien enemies.

- Coming Soon
